PROJECTS

❖ SMART SHOPPING TROLLEY and AUTOMATED BILLING SYSTEM

Smart shopping cart are read one by one and the bill is generated and displayed. After the final bill is generated the customer pays the bill by using their Pre charged cards provided by the shopping mall. The aim is to reduce the time consumption needed for the billing system.

❖ GAMING SHOP

Gaming shop is simple basic structure of website for html .It includes various sections such as a header, featured products, E-sport games, story mode games, and a footer. Each section showcases different gaming products with images, descriptions, and pricing information.and usages are html,css,images and links.

❖ INSURANCE CLAIM

The emergence of blockchain technology has revolutionized various industries, with insurance being one of the sectors poised for significant transformation. Decentralized applications (DApps) leverage blockchain's decentralized, transparent, and immutable nature to enhance efficiency, reduce fraud, and

improve customer experiences in insurance claim processing. This project explores the development of an insurance claim DApp designed to streamline the claims process, ensuring transparency and reducing administrative overhead.
